

1 **ABSTRACT OF THE DISCLOSURE**

2 A color-changing information symbol includes a board, a bulletin
3 portion formed on the board, and a lighting device having multiple optical
4 fibers to connect with and illuminate the bulletin portion. The lighting device
5 contains a light source projecting light to the optical fibers and a transparent
6 color wheel rotatably located between the light source and the optical fibers
7 to change the color of light. Thereby, the bulletin portion shows twinkling
8 and varying colors to make the information symbol attractive and
9 conspicuous.
